School Report to PCC

Dear Mr Adams,

The digital display screen and laptop on loan to the school are proving to be a very valuable asset in communicating and promoting the activities enjoyed by pupils at the school. The teachers have put together PowerPoint presentations that include videos, covering many different topics, for example, outdoor play, school trips, Eco- week, Book Week, numeracy and literacy lessons, as well as our involvement with the Tombs and Memorials Conservation Project at West Littleton. These displays scroll throughout the day in the entrance hall, giving visitors and parent an insight into school life. We have received many complementary comments.

We have a sign below the monitor which reads: 'This digital signage, including the computer is on loan from West Littleton PCC, funded by Cotswolds Conservation Board Sustainable Development Fund.' We have still to obtain the logo for the equipment from Nicola Greaves and discuss the publicity, however this is in hand.

We would welcome visits from members of the PCC to see the equipment in operation.

The history software is being used to support history topics throughout the school.

On behalf of the staff and governing body I would like to thank the PCC for inviting us to take part in the project and their generosity in loaning the equipment.

Yours sincerely,

Kay Pettifer
